**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed June 27, 2008 have been fully considered but they are not persuasive.

With regards to claim 1, applicant argues that Sideman does not disclose or suggest that the creation of the multimedia editing command file occurs at a client. The examiner respectfully disagrees. Sideman ([0024]-[0025] and [0076]-[0080]) discloses that the client produces and creates the edit list. Therefore, not only is the interface downloaded at a client but the creating of the editing command file is done at the client. Furthermore, applicant's argument that the creation of the multimedia editing command file occurs at a client is not positively claimed. Claim 1 merely recites the client creates a multimedia editing command file using a multimedia editing program, but does not preclude that the file is located at the server. In other words, the act of creating is independent of the location of the file. Hence, client interfacing with a program to create the editing command file is all that is required to meet the claim limitations.

With regards to claim 2, applicant argues that Sideman does not teach the downloading of a multimedia editing program from the server by the client. The examiner respectfully disagrees. Sideman ([0073] and [0084]) discloses a virtual video editor control panel displayed on his or her computer screen as well as a flash module downloaded by every client for formatting images. Hence, the virtual editor control panel in conjunction with the flash module serves as the multimedia editing program as they are each downloaded by the client as well as

Art Unit: 2623

being necessary for any editing to occur and function. Therefore, downloading the flash module and the virtual editor control panel is downloading the multimedia editing program although the actual editing is not performed herein, but because the editing process would not function without their use as they make up parts of the editing program as a whole. Furthermore, claim 2 refers to "the multimedia editing program" of claim 1 which merely only describes the multimedia editing program as where a multimedia editing command file is created with the usage of. Therefore, the multimedia editing program in itself could be construed as merely being the interface downloaded by a client in which the edit lists are created from ([0024]-[0025] and [0076]-[0080]).

### **Contact**

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricky Chin whose telephone number is 571-270-3753. The examiner can normally be reached on M-F 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Koenig can be reached on 571-272-7296. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through
